--	---

Description

The club consists of a round thin stem that tapers to an oval shape at the top. This merges into a tetrahedral decorated part. The edges on both sides are narrow. From the middle edges, the surfaces slope slightly. The upper end is flat and rectangular in section: the ornamented part widens towards the tip. The haunch is smooth, abraded and painted brown. One part of one half of the decorated section is light on both sides.
